Adding Title to iriver plus 2

Adding Titles in PC to the Library

- 1 Music or Audio files stored on the PC can be added to the [All Music] or Playlist in the Media Library.

Click and drag title from your computer directly to [All Music] in the Media Library window.
(Or, select [File - Add Library - Add file... or Add Folder...] select title to be added).

Adding Title to iriver plus 2

About Library Title

- 1 iriver plus 2 is capable of organizing the downloaded music files, mp3s, and other supported music files using the library features and also managing audio files from audio CD.

Easy to use file managing system organizes your music files and gives you direct access to the music you want as you need it.

NOTE

- Note, titles are not stored inside iriver plus 2. They are still files stored on your computer hard drive. If you delete or change files on your hard drive, iriver plus 2 will not be able to find or transfer those files.

Downloading to the product

- iriver plus 2 can transfer songs to your product. Select the searching location in the Media Library.

Connecting iriver plus 2 to the product.

- 1 Connect the product to your computer and power it on. The product window will be displayed. Refer to the User Manual for your product for additional information on connecting your product to iriver plus 2.

Downloading to the product

Downloading from iriver plus 2

- 1 Select the files on the PC to transfer to the product. Drag and drop to move files to the desired location on the product.

- 2 Download in progress

Downloading to the product

- 3 Download is complete once the files appear in the window for your product.

NOTE

- Files over 511 English characters (including path name and file name) will not transfer.

Playing Music in iriver plus 2

Playing Music in iriver plus 2

- 1 Select a title from [All Music] or the Playlist in the Media Library.

- 2 Click the [Play] button at the bottom of the Media Library window. In addition, you may double click on the music file to begin playback.

Extracting music information from CD

Extracting music information from CD

- iriver plus 2 can encode your music CD's. Encoding makes a copy of the music on your computer so you can listen with out the CD, transfer it to portable devices, create lists of your favorite songs, and more! CD's are encoded into WMA (Windows Media Audio) files.

1 Insert an audio CD into the PC.

You may have to click on the CD listed in the Media Library to show the tracks on that disc. The list of songs on the CD will be displayed in the Media Library.

2 Check the box for each song you want to encode.

Extracting music information from CD

- While the CD track information will be not displayed, right click on CD icon and select [Lookup CD From Gracenote]. If your computer is connected to internet, iriver plus 2 will look up music information in the Gracenote CDDb (CD Database) and display a list of matching results.

- Select [File - CD Encoding] to begin encoding the selected songs. In addition, you may click the [Encoding] button at the bottom of the Media Library to begin encoding the selected songs.

- Encoding may take several minutes, a progress indicator will display as each song is encoded. Once encoded, the new title is automatically added to All Music in the Media Library.

- The title will be saved in the [My Music] folder in your [My Documents] folder. Songs will be listed inside a folder with the album name.

The encoding display area of iriver plus 2 shows the time needed to encode each title. Click the [Close] button at the bottom to cancel encoding.

Creating a playlist in iriver plus 2

■ A playlist is a list of songs to be played. You can create lists of songs to play in specific order.

Creating Playlist

- 1 Right click on All Music in the Media Library window.
And select [New Playlist...] in the popup menu.

- 2 Enter a name for your new playlist, and click [OK].

Creating a playlist in iriver plus 2

- 3 The playlist will be displayed on the left side under the Media Library.
Click All Music and select a title from the listed files and then, drag it on the newly created playlist. Repeat to add additional songs to the playlist.
To select multiple titles, click the files while holding down the [Control (Ctrl)] key or [Shift] key.

Editing music information

- You can assign a rating to each song.

Rating Music

- Right click on a title in the Media Library.

Editing music information

- Click [My Rating] and select the number of stars to rate each song. 1 star being lowest rating and 5 being the highest rating.

Editing music information

- Some files may not display the correct information (Title, Artist, etc). You can edit the song information manually.

Editing music information manually

- Right click a title in the Media Library and click [Song Info...] menu.

Editing music information

- Use the Tag Edit window to enter the information and then click [OK].

Editing music information

- If iriver plus 2 is connected to internet, you can search for music information in the Gracenote CDDB (CD Database).

Using MusicID

- 1 Right click a title in the Media Library.

NOTE

- To use the [Identify with MusicID-Identify Tracks as Album / Identify Track Individually] function, iriver plus 2 should be connected to internet.

Editing music information

- 2 Click [Identify with Music ID – Identify tracks As Album...] or [Identify with Music ID – Identify track individually...] iriver plus 2 will look up song information and display a list of matching results. Highlight the correct title and click [Save tag].
